ENVIRONMENTAL PROTECTION

This appliance has a built-in rechargeable battery and the materials contained in the rechargeable battery may be harmful to the environment. Please remove the battery before discarding the appliance.

- Disconnect the power supply first before disassembling the appliance and removing the battery.

The battery must be handled safely.

- Do not use other batteries to replace the battery inside the appliance, especially non-rechargeable batteries, which may cause fire or electric shock.

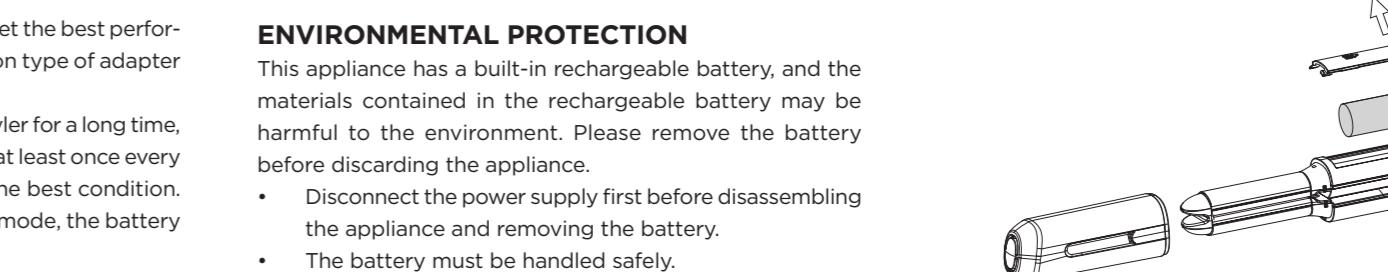

Do not discard used batteries with normal household waste, making sure that the battery is disposed of at an official recycling center or collection points.

- When the product is charging, other functions are disabled.

When the battery charge reaches less than 3 to 5 minutes, the LED indicator light will flash continuously.

The appliance will then automatically shut off once a battery charged has been used.

Remove the battery as illustrated.

TIPS

Before using, fully charge the product to get the best performance. Charge time will vary depending on type of adapter and power source being used.

Repeat process on additional sections of hair until you achieve the hairstyle you desire. It may be necessary to repeat process on certain areas, depending on the texture of your hair.

- While maintaining the tension, slowly pull the unit down along the hair section toward the ends.

At the ends, release the pressure on the handle and allow the hair to slide out.

Repeat process on additional sections of hair for a long time, fully charge it. Always be sure to charge it at least once every 3 months to keep the two-way styler in the best condition.

- When the product is in the charging mode, the battery indicator light will flash.

The battery must be handled safely.

- When the product is fully charged and the charger is still connected, the battery indicator light remains solid.

Some experience is necessary when learning to use this two-way styler. After using the iron several times, you will learn the ideal way to straighten and style your hair.

GETTING STARTED

- Before using, fully charge the product for maximum battery performance, and always be sure to read all the instructions.
- Slide switch to turn the unit on by selecting "V" or "—" mode. Indicator light will blink while it is heating up. Solid light indicates it is ready to use.

Note: Slide ON/OFF switch to "O" to turn styler off.

TO CURL HAIR

Ensure hair is dry and combed through.

- Set the appliance to curl mode.
- Lock plates closed.

Take a 25mm wide section of hair, starting 50mm from the scalp. Ensure the end of the appliance is pointing down toward the shoulder.

Wind the section of hair around the barrel toward the cool tip.

Hold the ends of the hair in place at the cool tip for 5 to 8 seconds, depending on hair type, and then release.

This is the newest technology. It not only makes it simpler to clean off styling product residue, etc., after each use, but you'll find that hair glides easily over the surface of the heating plates. The ceramic surface also helps smooth down flyaways and frizzies for added shine.
